"Achieving Excellence Through Analytical Service"

## Inception & growth

### Humble beginning :

Established by Mr. Chandubhai Nai in the year 1989. He being the Founder & MD of Manisha Analytical Laboratories Pvt. Ltd; is a well known personality in the chemical and pharmaceutical Industry for more than 30 years.

His leadership, vision and passion has lead the company to grow from one unit to 4 different units at various locations in Mumbai.

### Group of Manisha labs is well-equipped with the latest Technology

- LC-MS/MS
- GC-MS/MS
- ICP-MS
- UPLC (With UV/PDA)
- HPLC (With UV/PDA / RI & Fluorescence detectors)
- GC-MS
- AAS-Flame & Graphite Furnace
- Ion Chromatography
- Dissolution Tester
- PSD Analyzer
- PM Analyzer
- Protein, Fat and Fibre Analyzer
- FTIR
- UV/Visible Spectroscopy
- Potentiometer
- Polarimeter (Digital)

### About our group

- Our company is managed by a team of technocrats who are experts in the field of analytical testing of pharmaceuticals & food products.
- We have a committed and qualified staff, dedicated for pharmaceutical testing since the last 3 decades.
- Our sister concern, M/s. Beepharmo Labs. Pvt. Ltd. has been accredited by NABL, BIS, APEDA, FSSAI, AGMARK, FDA-Maharashtra & ISO:9001-2008.
- In addition to chemical, food and pharmaceutical analysis, we undertake microbiological and biological analysis.
- Use of animals for Pyrogens and Toxicity testing according to strict guidelines of CPCSEA and GLP

## Our business partners

# Our latest site location

- New site of Manisha Analytical Laboratories Pvt. Ltd. is located at Mira Road (E) on the Western express highway in the building named as "Ramdev Plaza"
- Situated approx. 20 km from Mumbai Airport & is convenient to reach by Road or Railways.

## Our new Site's salient features

- Dedicated pharmaceutical products Testing Laboratory for stringent regulated markets such as USFDA, MHRA, TGA etc.
- Laboratory is well equipped with electronic laboratory notebooks (ELN) to support data Integrity and data Management
- Effective project management using ELN
- Our technical team has rich experience in the field of regulated Market

## Our Quality Objectives

- To provide efficient and accurate quality services to our customers.
- To impart appropriate training to enhance our employee's competency,
- To reduce sample handling and processing time to ensure prompt and on time analytical results.
- To receive feedback from customers and address grievances efficiently,
- To enhance customer satisfaction and to reduce customer complaints.

# Our testing facility at Mira Road

## Instruments available

Instrument Name	Make	Model
HPLC (UVPDA)	Waters	Alliance e2695
UPLC (UVPDA)	Waters	Acquity H Class Plus
GC-HS (FID)	Agilent	7890B/7697A
Dissolution Tester	Electrolab	EDT-14LX
FTIR	Jasco	FT/IR-4600
UV Spectrophotometer	Shimadzu	UV1800
Walk-in Stability chambers (Total Capacity: 1,20,000 L)	Newtronics	NLWH555SU
Auto-titrator	Metrohm	907 titrando
Micro analytical balance	Mettler Toledo	XPE26
Semi micro analytical balance	Radwag	XA210.4YA
Water purification system	Adrona	Q-Front
Water purification system	Millipore	Milli-Q
Glassware cleaning machine	Lancer	820 LX

## We undertake analysis of

- Tablets, Capsules (Hard & Soft gel)
- Liquid Oral
- Ointments, Gels & Creams
- Topical Powders
- Liquid/Dry powder Injectables
- Lyophilized Injections
- Other items such as APIs, Excipients and other formulation & additives

## Our capabilities

- Analytical method development
- Analytical method validation
- Process validation
- Stability Study
- Residual solvents
- Impurity Characterization & Profile
- Dissolution Profile
- Biowaiver Studies

Glimpses  
of Manisha Lab  
new site profile

## Our utilities sections

### Environment health & safety

- Fire alarms
- Smoke detection system
- Safety protection apparels and Equipments
- Fire extinguishers in every working area
- CCTV
- Eye & Safety Showers
- Exit routes

### Utilities

- Power back up through UPS
- Gas Generators for GC
- Server based instrumentation and online data backup
- DM water plant.
- Storage system for reagents
- Archival & System for documentation

## Quality assurance & GLP systems

### Quality assurance

- Change control system
- Laboratory incident
- OOS & Investigations
- Deviation
- Handling of CAPA
- Sample management
- Document management

## Equipments and Instruments

- URS
- IQ, OQ & PQ
- SOP Preparation and finalization
- Preparation of Log Books
- AMC Decided for Calibration and Maintenance

## Stability testing

6 Walk-In stability chambers with a capacity of 1,20,000 L of Newtronics, operated by ICDAS 2.1 **With Inbuilt Alert and Alarm System**

### Storage conditions:

- 25°C/60% RH,
- 30°C/65% RH
- 30°C/75% RH
- 40°C/75% RH
- And many more as per the requirement

## Our Experience is Your Protection... Today and in the Future

Since 1989, Manisha Analytical Lab has provided efficient analytical testing services to an extensive spectrum of customers. We have a broad-based background and are thoroughly proficient in a diverse range of industries. We offer world class equipment and maintain an experienced and highly knowledgeable staff. Yet we are steadfast in paying careful attention to minute detail, striving always to provide the highest levels of quality and customer service.

With our broad vision and excellent reputation comes the exciting prospect of the future. Our progressive management staff is continually researching equipment, systems and procedures to meet and exceed the challenges tomorrow will bring.

Quality assurance is not just a slogan.  
It's a state of mind.
